

## HW #1 (10pt)

### 1) Create the survey form using HTML and CSS. (5pts)

- The <form> element needs to be used to create an HTML form for user input.
- Inside the form element, provide different options to the user like name, email, age, etc. Providing respective input types according to the question (email for taking email input, text-area for taking a large message, the name for taking name input, etc.).
- Use the radio-button, check-button (let the user select zero or more options of the provided choices) and submit-button (the button for submitting the form data to a form-handler).
- Color or space margin doesn't need to be the same.
- **Submit the file(s) to Blackboard by zipping.**

**CS 5130 Survey Form**

Name  
Sanghak Sung

Email  
email@email.com

Age  
28

Your favorite IDE?  
Visual Studio Code

How was your summer?  
☒ Fantastic  
☐ Barely Survived  
☐ Can't remember  
☐ So-So

Languages and Frameworks known (Check all that apply)  
☐ C  
☐ C++  
☒ C#  
☒ Java  
☐ Python  
☐ JavaScript  
☐ React  
☐ Angular  
☐ Django  
☐ Spring

Any comments or suggestions  
Yeah!

## 2) Creating your webpage in 000webhost.com (5pt)

- Create **free web hosting account** at 000webhost.com and upload index.html file to the public\_html folder in File Manager (000webhost.com).
  - o After you upload index.html to the 000webhost, it takes about 10min until you see the right response from the web browser. You need to be patient to see the result.
  - o If something is not working on 000webhost, try to figure it out on your own. Instructor doesn't have any access to your 000webhost account.

- Provide your domain name that shows your website like this.
  - o Use your own website name other than cs5130
  - o ex. <https://cs5130.000webhostapp.com/>

**\*\* Be sure to add zip file and domain name like this.**
